

Attendance:

Present:

- David
- Sam
- Brandon
- Boris
- Peter

Apologies received from

- Alan
- Akif

Items arising from previous meeting:

Current Items:

- Ideas:
  - Present day's lectures in a multimedia-presentation format.
  - Scriptable "card deck" (a-la [HyperCard](#))
  - CV thingo, tying QR codes to Card Decks
  -
- Questions for Stuart:
  - Talk about potential ideas
  - Target Java Version, 8, 11, 16?
  - Forced Build System - Ant, Maven, Gradle, Other?
  - PWS agreement. Discussed in lectures later
  - HTML Tour?
- All Specification Docs written in LaTeX and put in the Git please. Meeting minutes and such in the Shared Drive.

AOB:

No

Actions Arising:

- Consider the Functional Spec (WK8 Deadline) and QA manual (WK10 Deadline). Bring comments to next meeting - ALL
- Ask Stuart some questions - Whoever wants it.

- Meet 1500 Monday 01/10/21, Tower 1st floor

There being no further business, the meeting was adjourned at 14:20.

Stuart Meeting 29/10/21

Pretend product won't end at end of dev cycle.

Identify target market. Just find a niche.

Target Java 11.

HTML tour is just a way to submit Docs.

We can use any build system - go for Maven, since we can use any IDE or none.

We can say, ie. "Working to the methods outlined in the Agile Manifesto, by doing XYZ"

Quality manual should outline the process in main, other things like Code Standards in Appendices.
