?

Items arising from previous meeting:

- Decide on initial idea
- Draft functional specification

Current Items:

- Functional Spec.
 - What are we making?
 - * Card deck presentation, with ability for live sync, persistent state, scripts.
 - Firm goals & stretch goals.
 - Firm
 - * View presentation
 - * Remote card advance
 - * Persistent local card-deck state
 - Without breaking remote!
 - * Simple script engine/"dynamic" properties.
 - * Editable/creatable in viewer
 - * Cover all media types
 - Stretch
 - * Telemetry to presenter
 - * Import from other presentation format
 - * Version Control/Checking
 - * Permissions system (view, add, visual edit, script edit ?)

AOB:

Actions Arising:

Brandon to skeleton-out the functional spec, we should all then add to (Git commits will be recorded for timing information). Once roughly complete, Brandon/other to smooth out.

- Please don't push to Release branch until then!

All to consider QA Manual.

There being no further business, the meeting was adjourned at 16:10.
